

GIS in Action

Geospatial Revolution: Videos

Episode 1: Positioning, Technology, Public inputs

- How important is positioning with GPS for work in GIS? How might this change?
- What is the suite of technologies that make GIScience possible?
- During the Haiti earthquake of 2010, what helped and how?
- “Revolutions rarely end out the way they started”—What is new now?

Episode 2: GIS and our daily lives, planning, business, issues

- Does GIS enable democracy?
- What did Portland do with GIS?
- How does GIS help UPS?
- What is telemetrics?
- What is a food desert?
- “Geography is now about technology that is going to help”—True?
- Are there enough people with GIS skills?

Episode 4: Think about Climate, Hunger , Disease: Participation

- How can GIS show change on maps?
- How do climate models and GIS work together?
- How can GIS reduce hunger?
- Who was John Snow?
- How does CDC use GIS to track disease?
- How is Kibera, Kenya using GIS?
- What are the “new ways to take advantage of maps”?
