II. Description

- Active背包

   Activation of the model: the model description is determined by the model and its parameters, which are expressed through the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.

   The activation of the model is achieved through the model's parameters, which are determined by the model's parameters. The activation of the model is achieved through the model's parameters, which are determined by the model's parameters.
Discussion
REFERENCES

For this study, the data were preprocessed to obtain the raw data which were then analyzed using statistical methods to determine the attributes of the cancer patient.
