Supplemental notes

The following seven procedural steps will lead you through changing the shape, size, and color for an individual observation in your Excel graph.

Step 1: Left click on the observation for your country. Notice that all of the points become highlighted.

Step 2: Left click a second time on the same observation and it will be the only one highlighted as shown below.
Supplemental notes (cont.)

Step 3: After the second left click the menu shown below will appear. Choose **Format Data Point**.

Step 4: After step 3 you will see the following menu.
Step 5: Use the **Style** pull-down menu and select the diamond shape.

Step 6: Use the **Background** pull-down menu and select red.
Supplemental notes (cont.)

Step 7: Click on the up arrow next to **Size** to increase the symbol size to 7.
